

Job Title:	Graduate Software Engineer	Contract type:	Permanent
Department:	Development	Location:	Hungerford, Berkshire or Gateshead
Reporting to:	Development Manager	Contact:	recruitment@kerridgecs.com

Position Overview

- Kerridge Commercial Systems (KCS) is the market leader in developing and delivering fully integrated business management solutions for distributors, suppliers, resellers, wholesalers and merchants. Our mission is simple: to design, implement and support high performance systems that enable our customers to source effectively, stock efficiently, sell profitably and service competitively.
- As a member of the Development department you will be involved in the full software lifecycle developing software as part of a project team to create the next generation of our products.

Main Duties and Responsibilities

- Write code for new features to deliver against specified requirements
- Maintenance of existing features, including defect fixing
- Design small software components that form part of a larger solution
- Conduct unit testing of own code, fixing errors before submitting to integration and system test
- Submit code to peer reviews and modify code in line with the feedback received
- Provide clear updates on progress against assigned tasks
- Escalate any problems and exceptions in a timely manner, with suggested solutions or workarounds
- Provide time estimates for allocated tasks
- Work as part of a project team of software engineers, testers and Business Analysts

Knowledge and Experience

Academic

- 2:1 degree (or expected) in Computer Science, Software Engineering, Mathematics or Physics
- Excellent A-Level grades (or equivalent), including mathematics

Essential

- Experience developing software to a professional or academic standard
- Passion for software design and development
- Relational database knowledge

Desirable

- Familiarity with Oracle and / or SQL
- Windows and UNIX/Linux
- Experience of C++, C#, Visual Basic
- Script language development experience – Perl, Python, Bash, Tcl
- Commercially-focused software development experience
- Formal testing methodologies; experience of testing own programs
- Previous work experience
