

Job Title: Mobile Application Developer	Contract type: Permanent
Department: Development	Date: February 2017
Reporting to: Visual Developer	Contact: recruitment@kerridgecs.com

**Position Overview:**

- Kerridge Commercial Systems is the leading specialist supplier of fully integrated ERP systems and related services to niche vertical markets in the wholesale and retail distribution, logistics and service sectors.
- Working as part of a dedicated development team, this role involves working with local and remote teams (in the UK and abroad) to develop new mobile applications and features for the Kerridge Commercial Systems group as well as delivering fixes for our customers.

**Main Duties and Responsibilities:**

- Carry out programming tasks from specifications against specific project timescales
- Conduct unit testing on own code with documented summary test plans, and fixing errors
- Submit code for peer review and make modifications in line with feedback received
- Participate in peer review of code and specification, making suggestions to increase quality
- Schedule own time to deliver against assigned priorities in line with agreed project timescales
- Provide clear updates on progress against assigned tasks
- Escalate problems and exceptions that need to be addressed in a timely manner, with suggested solutions and workarounds.

**Skills, Knowledge and Experience:**

## Essential

- .NET Mobile Developer skills including C#, Xamarin.Forms (or Xamarin.Android / Xamarin.iOS), Web Services
- 2:1 degree or above (or expected) in Computer Science, Mathematics, Physics, or other numerate
- Excellent A-Level grades (or equivalent) including mathematics
- Experience developing software to a professional or academic standard
- Have a passion for software design and development
- Good communicator, capable of working from specifications to deliver solutions.
- Able to work individually and as part of a team

## Desirable

- An understanding of networks, SOAP and RESTful APIs
- Working knowledge of source control, continuous integration, build servers, automated deployment

- Integration with third party tools like Google Analytics and social sites
- Work experience on commercial mobile applications
