Fast, flexible and future-proof rental software

Klipboard lives and breathes rental, helping thousands of businesses of all sizes across the globe digitise their rental processes, increase utilisation and improve their bottom line. We are trusted by some of the most respected names in the industry and have provided solutions that allow our customers to join the dots where other providers fall short.

Our industry-leading, award-winning rental software solutions focus on making the lives of our users easier, now and in the future. Having a transparent and collaborative working relationship with our users empower us to continually develop our systems to suit businesses of all sizes, ranging from single-user and single depot, to thousands of users operating on a global scale. Rest assured, no matter the size of your business, industry you operate within and most importantly, your requirements, Klipboard has got you covered.

The rental industry continues to evolve with working methods, regulations and customer behaviours constantly changing. Now is the perfect opportunity to embrace and anticipate these changes with the help of the Klipboard team. From increasing productivity to promoting sustainability, start your digital strategy with Klipboard today.

Intrigued? Let us take you on a journey that will show you exactly how Klipboard's solutions can save you time and money by driving efficiencies across your entire business.

Rental and sales order processing

Effortlessly manage the entire rental cycle with Klipboard's core solutions, OnRent One and OnRent Office. Take advantage of the powerful tools that enable you to gain total control of your business.

Seamlessly convert quotes to bookings

- Create key documentation in seconds
- Manage flexible rates and prices
- Compare supplier cross-hire prices
- Manage cross-hires, exchanges, suspensions and more

1

2

Instantly see what's available

- Rapidly scan equipment for simple allocation
- Easily see rental equipment availability
- Ultimate cross-hire functionality to manage shortfalls
- Manage serialised and non-serialised stock with full certification tracking

Logistics and planning made easy

- Manage all logistical activities, including third party transport
- Capture digital signature and damage management photos
- Easily allocate deliveries, collections and depot transfers onto vehicles
- Assign a delivery to a single vehicle or split it across multiple vehicles

3

4

Invoicing at the click of a button

- Produce thousands of invoices in minutes and send in bulk
- Read customer account information live from your accounting package
- Email invoices to customers on a mass scale
- Full fixed asset register functionality available

Dynamic, interactive reporting

- Gain an in-depth insight into every area of your business
- Create live rental reports on what's out, and where
- Produce your own custom reports using SAP Crystal Reports
- Analyse the utilisation and ROI of your rental equipment

5

Effectively manage your global operations, all from within one solution

OnRent One is a multi-company, multi-language, multi-currency enterprise-level rental ERP that enables a consolidated view of your global operations and performance. With extremely advanced features, OnRent One is designed to meet your specific business requirements and completely adapts to make managing complicated processes easy.

Our desire has always been to create the UK's premier plant hire company. We couldn't have achieved that without OnRent One.

Grow your business with rental management software you can trust

Gain full visibility of what's going on across your business by operating an all-in-one solution that not only connects the dots, but saves you time and costs.

- Deliver a superior level of control with easy access to your rental data, including the ability to see equipment availability from multiple companies/locations within one centralised view.
- Drive efficiencies, customer retention and business performance with Klipboard's advanced reporting suite and receive daily notifications for sales pipeline and interactive views.
- Manage your entire business in one system: Klipboard enables your preferred systems to work together seamlessly, alleviating maintenance and enabling you to capture a picture of the ROI of your chosen systems.

Workshop and maintenance

With Klipboard's fully integrated workshop functionality, in both OnRent Office and OnRent One, you can ensure all assets are safe, compliant and ready for hire at all times.

Cover all angles of workshop management

- Quickly book items in and out of service or repair
- Easily allocate parts and labour to workshop jobs
- Raise purchase orders to suppliers directly from a job
- Customer sign-off for repair and damages

1

2

Minimise breakdowns, maximise utilisation

- Instantly create breakdown jobs with OnRent Mobile
- Proactive scheduled maintenance reports
- Highlight recurring equipment failures
- Record meter readings against your equipment

See what's in service from anywhere

- Allocate workshop jobs to engineers while on-the-go
- Easily see the full-service history and expiring certificates
- Enhance customer service by repairing customer-owned equipment
- Know the status of your services and repairs at all times

3

4

Be one step ahead with certification

- Create checklists to ensure jobs are completed to regulation standards
- Be alerted with certificate expiry when allocating an item to a contract
- Effortlessly organise your team with the Resource Scheduler
- Use SmartViews to track when items are due to be renewed

Save time, parts and money

- Analyse costs and income on each job down to the individual parts used
- Seamlessly raise purchase orders to suppliers directly from a job
- Charge a client for internal repairs, including timesheet entry for engineers
- Build an archive of workshop jobs for an overview of performance

5

- Payment
- Analytics dashboard
- Attachments
- Static page editor
- Admin messages
- Delivery charges
- Google Analytics integration
- Images
- Reviews

Discover a fast, flexible and future-proof way of protecting your business, at-all-times

Cloud hosting:

Whether we realise it or not, we all use the cloud to manage vital parts of our everyday lives. Online banking, sending emails and browsing social media are all examples of this. But why should you use the cloud for your business?

Simple, server attacks are on the rise and Klipboard can help you prevent it. The last few years have proven we need to be equipped with agile, secure and future-proof systems, and the cloud provides just that. As well as other benefits...

Protect your business from server attacks and transition your Klipboard system to the cloud today. As well as providing increased security it will allow you to focus on strengthening your rental operations, providing a better customer experience and increasing your ROI - from any device, anytime, anywhere.

Any device, anywhere

Whether you're at home, out on-site, on the road or overseas, the cloud allows you to access your rental data from any location. Whether it's a client enquiring about available equipment, to discuss a quote you sent or to find contact details for a person or organisation – with the cloud, you can get the job done, from anywhere.

Save time & costs

Perhaps the most enticing benefit of cloud computing for almost any business is the way that it can help you to reduce costs in almost every department by streamlining processes, enhancing security, and reducing errors and losses a considerable amount.

Automatic updates

There are multiple benefits to hosting your rental business in the cloud, for starters, all updates are automatically rolled out. This means the features are instantly available for all to use as soon as they are updated, rather than waiting for someone available to update each device separately.

Increased agility

The cloud is easier to upgrade and will allow you to scale along with your business, meaning you'll always have management platforms that are capable of handling any increase or decrease in demand. Plus, after the past few years, remote access has never been so high in demand.

Enhanced security

Because your data is stored in the cloud, it can be accessed no matter what happens to your machine. You can even remotely wipe data from lost laptops, so it doesn't get into the wrong hands, providing much more flexibility and control over your data.

More powerful resources

With the help of the cloud, businesses find that they need not be restricted by their in-house tech, instead they are able to utilise the power of the cloud to boost and enhance operations without the need to alter the physical infrastructure at all.

A solution for every step of the rental cycle

Discover Klipboard's layered applications and additional modules that can further improve your rental business.

Cloud hosting

Manage your rental business on any device, anytime, anywhere by hosting in the cloud.

WebPortal

Allow your customers to self-serve with 24/7 access to their hire and rental information.

Digital twin

Create unique QR codes for your assets and allow customers to access manuals, certificates as well as other documentation.

Klipboard Money

Automate payments and enjoy the effortless workflow of taking deposits through one system, removing double entry of data and work for hire desk teams.

Klipboard CRM

Use actionable insights to improve how you sell, service and manage customer relationships, all while generating quality leads from any location.

Asset Tracker

Display the location of all assets, contracts and mobile users in one Google Maps view, all while enabling users to drive operational activity.

Klipboard API

The Klipboard API enables us to build new, seamless integrations with the systems your business is already using.

Route Optimisation

Be one step ahead at all times by taking the time and effort out of planning your scheduled site services.

Telematics Linking Tool

Our telematics linking tool seamlessly integrates all your telematics data in one central location. Track geolocation of machines and automate hire charging and maintenance based on usage data.

Supercharging your rental business with connected systems

Seamlessly integrate with your favourite third-party software solutions and bring your business together. Discover over 100 integrations across finance, telematics, equipment testing, CRM, document capture and email marketing - providing you with ultimate flexibility.

ERP One[®]

Fully-integrated business management systems for trade, wholesale, manufacturing, field services and distribution businesses.

For accounting, payroll, HR, ERP, payments and more. Whether you're a start-up or a global enterprise.

Vehicle tracking systems that give you a complete overview of your fleet at all times.

Web mapping that offers satellite imagery, street maps, 360° street-view, real-time traffic conditions, and route planning.

Confirm that your machines are well maintained without having to travel around work sites inspecting machines.

Send beautiful emails, connect your e-commerce store, advertise, and build your brand.

SimplyPats

Manage and produce all of your PAT test reports and certificates.

Online accounting for businesses to manage invoicing, bank reconciliation, bookkeeping and more.

For small businesses and self-employed workers to manage their accounting processes.

Phocas.

Powerful data analytics and financial planning tool, accessible anywhere, anytime. Pulls information from multiple systems that matter to you and your business and displays in one consolidated view.

what3words

Ensure you are always directed to the required drop-off point by narrowing down the location to a 3×3m squared geolocation.

SAP Crystal Reports: Create, design, and deliver formatted and dynamic business reports and invoices to simplify and accelerate decision-making.

Product features matrix

Whatever your hire business requirements Klipboard has the solution for you. Designed to be scalable, they will grow as you grow, giving your rental business the fit needed for now and for the future.

Get started with Klipboard

Klipboard's skilled team of industry specialists have a passion for our rental management software and providing the best customer service. Our priority is to get to know you and your requirements, then to look after you every step of the way when implementing a Klipboard solution that works for your business.

Consultation and demonstration

First, we will find out what you are looking for in a hire software solution and talk through your key objectives. We'll consider your individual business requirements and identify the benefits you will enjoy from using Klipboard solutions and look at the ROI, ensuring you get the most out of your system.

Implementation, project management and training

Our highly experienced team will be on hand all the way through your project. We'll provide you with practical lessons and training, and we'll agree on your objectives and milestones to ensure deadlines are met, ready to go live. With decades of real-life hire exposure, you can rest assured that you're in the right hands.

Account management and helpdesk

Our account managers are here to help you get the most out of your Klipboard solution, giving you tips and advice on which new features will improve your business processes. Our dedicated helpdesk team are on hand by phone or email to assist when you need it, and our very own online customer portal gives you access to help files, training videos and much more.

Development

We have an expert team dedicated to developing innovative new products using cutting edge technologies. As a result, we're constantly improving and adding new features to our software that enable you to embrace new functionality and technology as you need it. That way, you stay ahead of your competitors.

Go green and grow profit

At Klipboard, our products help you go green for a better future. But the benefits don't end there. Our full range of products can drive efficiencies throughout your operation.

As shown below, this means you can:

Protect
your business model

Enhance
your reputation

Increase
your market share

Grow
your profit margin

Reduce footprint & expenses

No one likes waste. When customers rent, they get what they need, exactly when they need it.

But what if you could strengthen your service offering by enabling your customers to be more sustainable?

Klipboard solutions have specific features that allow rental businesses and their customers to be more environmentally friendly with CO2 reporting and sustainable equipment recommendations.

Optimise your equipment

Inefficient scheduling of equipment means more harmful fumes for the environment. Meanwhile, your business could pay higher annual fuel costs of 10-30%.

Klipboard's Asset Tracker helps you see where your equipment is. Then the software helps you define a depot radius. That way, it's easier to cross-hire your gear locally and create efficient delivery routes.

Go paperless

Printing doesn't just use trees. All the maintenance, storage, and management costs combine to more than you'd think.

Klipboard & Sales Order Processing module sends all your proposals and invoices online. While the Operator and Resource Scheduler will digitise all aspects of your resource management.

When you go paperless with Klipboard, you remove your printing headaches. This means you can enjoy a clear and stress-free audit trail.

Work in the Cloud

On-site servers mean running costs: you pay for power, air-conditioning and maintenance. Plus, additional overheads for IT consultants and all the hardware and software updates.

Klipboard software can run on a cloud server, helping you avoid all these expenses and the hassle of housing all the equipment in your workplace. This enables you to reduce your carbon footprint by 60%, and a further 15% on annual outlay costs – it's a no brainer!
